

Dear Customer:

Thank you for choosing WDT Digital.

Please follow carefully the instructions on both sides. We will guide you through the installation process and explain how you can manage your account.

Please connect your WDT Digital equipment as shown on the diagrams on the reverse page. After you have properly connected the equipment, please power cycle all network devices (plug and unplug the power). Allow 5 minutes before you start using the service.

Important! To make calls please dial:

1 + area code + phone number for domestic calls

011 + country code + phone number for international calls.

Important! Do not forget to submit a port-in request if you want to **keep your current phone number**.

You can do this by logging into your WDT Digital account online and entering your details under **"Port existing number"** category. Do not disconnect your local service while the port-in process lasts. If you cancel your local service before the port request is completed your number may be lost.

You can manage your account online.

Go to **www.wdtdigital.com**

To log in use your account number (876XXXX) as a User ID and the password that you created during the registration process.

Once you log into your account you can

- view your billing history
- change your calling plan
- view your calls details
- change your personal settings
- manage call forwarding feature
- set up voice mail and many more
- port your existing phone number

For more information please visit us at **www.wdtdigital.com** or call WDT Digital Customer Service at **1-888-606-0938**.

On behalf of everyone at WDT, we thank you for choosing WDT Digital. You have made a fine choice and we look forward to serving you.

WDT Digital Installation Guide

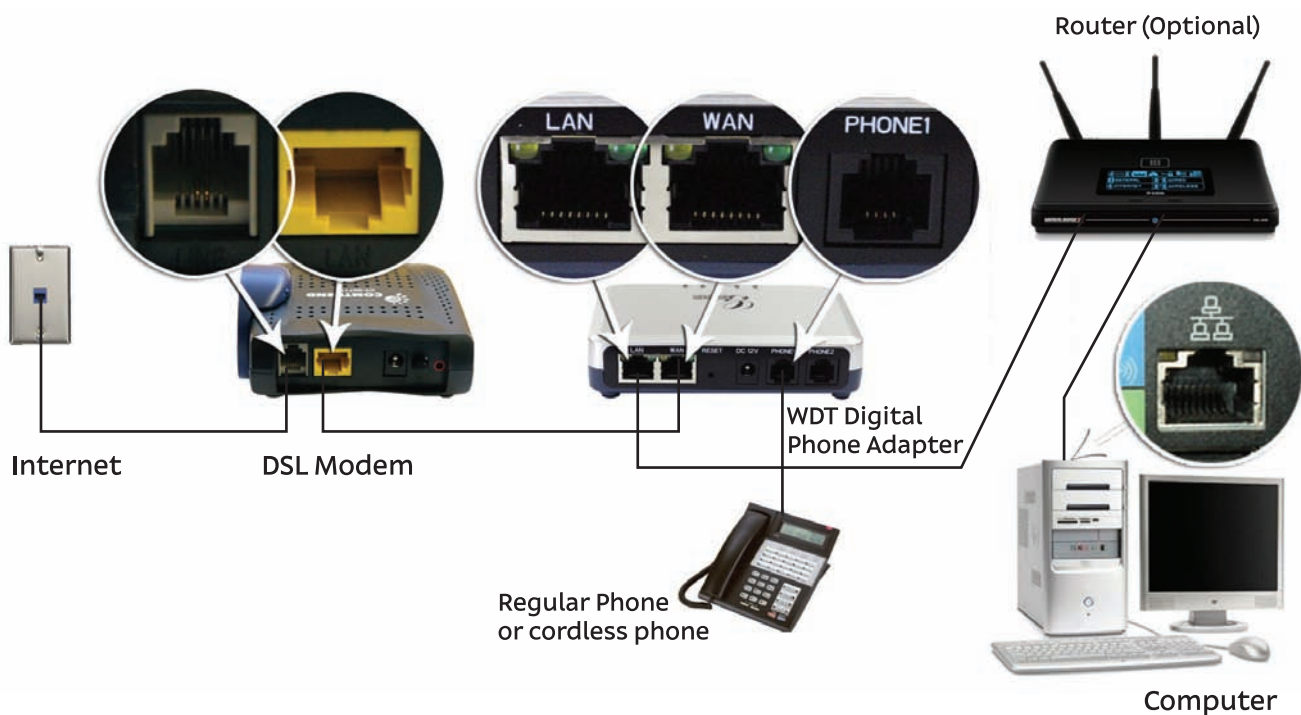

Please connect WDT Digital equipment according to one of the diagrams below. After you have properly connected the equipment, please power cycle all network devices (plug and unplug the power):

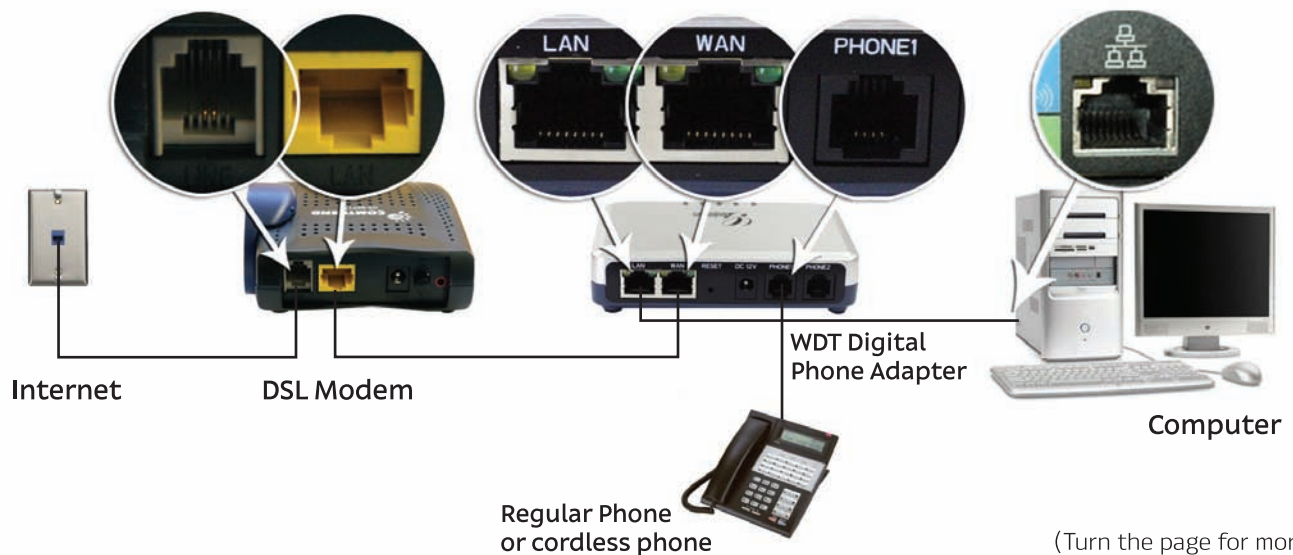

- Power on the DSL Modem and wait until all lights are on.
- Power on WDT Digital phone adapter and wait until Power, WAN and Phone lights are on.
- Power on your router and/or computer (LAN light on the adapter will be on).

Please allow **5 minutes** before you start using the service.
